

Whitepaper

Nanos Finance™

Nanos Finance™ is an International **Group of Companies** consisting of multi-jurisdictional entities registered and licensed to perform financial functions in the global market. The edge that **Nanos Finance** hold in the modern global financial market is the licenses that it proudly holds from the major trading capitals of the world today along with a groundbreaking decentralized exchange platform built on the Base blockchain, designed to enhance the efficiency and flexibility of digital asset trading.

Until recently, the Cayman Islands had been the preferred choice for private equity and venture capital (“VC”) funds in the MENA region. At **Nanos Finance**, we have been witnessing a growing trend of domiciling these types of funds in the CIMA (Cayman Islands), FINTRAC (Canada), and RAKEZ the Ras Al Khaimah Economic Zone (UAE Dubai). Therefore, we offer a comprehensive solution to cater to all the popular jurisdictions for private equity and venture capital (“VC”) funds.

Nanos Finance (“Nanos”) is a fully regulated web-based platform and fund, operating under the oversight of multiple global financial regulators, including FINTRAC (Canada), CIMA (Cayman Islands), and the RAKEZ (UAE Dubai). These regulatory approvals strengthen Nanos' presence in key financial jurisdictions and expand its service capabilities.

With its comprehensive licensing framework, Nanos offers the following financial activities:

- Advising on Financial Products
- Arranging Credit and Advising on Credit
- Arranging Custody
- Arranging Deals in Investments
- Dealing in Investments as Principal
- Managing Assets

Nanos Payments

Nanos Payments combines the reliability of traditional banking with the innovation of digital finance, providing businesses with a comprehensive and secure financial infrastructure for growth in an evolving financial landscape.

Multi-Currency Accounts & Transfers

Facilitate global transactions with multi-currency accounts, seamless international transfers, and integrated fiat-to-crypto conversion.

SEPA Instant Payments

Enable real-time, cross-border transactions within Europe, ensuring fast, secure, and cost-effective payments.

Multiple IBANs

Offer dedicated personal and business IBANs for efficient multi-currency transactions, ensuring easy integration with financial systems.

Virtual & Physical VISA Cards

Prepaid USD VISA cards accepted worldwide. Issue both virtual and physical cards with no traditional bank account required, supporting Apple Pay and Google Pay for seamless digital payments.

Crypto Trading & Wallet Solutions

Support secure crypto buying, selling, and trading with integrated wallets and fiat on/off-ramp capabilities.

Seamless Onboarding & API Access

Accelerate business integration with a streamlined onboarding process and a robust API for customized financial solutions.

Security & Compliance

Ensure fund protection with advanced hardware security, regulatory compliance, and fraud prevention measures.

Platform

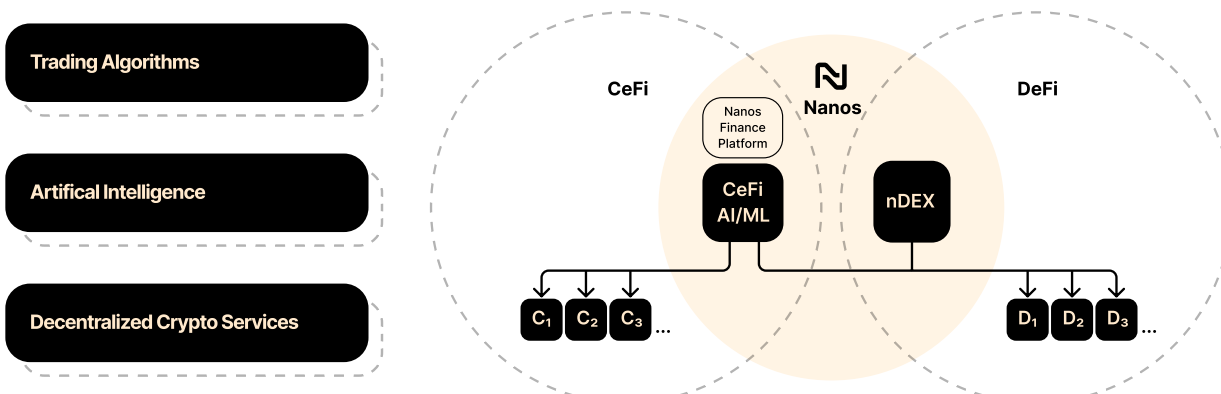

Overview

Nanos Finance introduces a groundbreaking decentralized exchange platform built on Base blockchain, designed to enhance the efficiency and flexibility of digital asset trading. Central to its innovation is the hybrid engine that combines a generalized order book for range orders with fungible concentrated liquidity in a unique manner.

Unlike traditional limit orders, our range orders allow traders to set not just a single price but a price range, optimizing the execution, as the market price enters and passes through this range. This mechanism is complemented by our proprietary logarithmic units, "docents" and "domilles," which provide intuitive financial increments for price quantization.

Additionally, **Nanos Finance** eliminates fees for range orders, fostering liquidity while leveraging market order fees to balance the ecosystem. The platform's architecture supports a dual structure for tracking buying and selling prices, ensuring that all transactions are efficiently managed with minimal computational overhead.

Nanos Finance aims to democratize financial markets by offering more accessible, understandable, and user-friendly trading mechanisms, significantly improving upon existing decentralized exchange models.

What does Nanos Finance bring to the Market?

Blockchain and Decentralized Exchanges. Blockchain technology has revolutionized the financial landscape, introducing a paradigm shift from centralized to decentralized systems. Decentralized exchanges (DEX) are at the forefront of this transformation, offering users the autonomy to trade cryptocurrencies without the need for intermediaries. Despite their growing popularity, current DEX platforms often face significant challenges such as poor liquidity, high slippage, and limited order flexibility.

Nanos Finance will enable investors to co-invest funds in profitable crypto investment products provided or integrated by the platform. Investment products expected to have above market returns, and will be based on trading algorithms (provided by Nanos Finance platform), artificial intelligence, decentralized services (e.g. liquidity pools with automatic dynamic liquidity concentration for various crypto tokens). It will be possible to invest in full auto mode where funds will be managed as a portfolio, being invested into multiple products and with automatic rebalancing of risk, reinvesting profits etc. or manually investing into specific investment products, being able to see and analyze actual transactions performed and how the system continuously adjusts / improves.

Platform will provide full transparency and traceability into specific trades / transactions performed by the investment products. Platform would also decouple different user funds - individual user's decisions would not impact other investments; users would take full ownership of profits / losses made. In addition - investment products are designed to scale with the investment amount - larger investments expected not to diminish existing investment return within wide investment range (100M-2B).

Later on evolving trading algorithm AI capabilities (Nanos Finance Platform) would enable creating a dynamic algorithm environment, where algorithms would work significantly more autonomously and adaptively, improving their performance. Platform will initially support main cryptocurrencies (BTC, ETH) and stablecoins (USDC, USDT). Later increasing the coverage to additional cryptocurrencies.

The layout of **Nanos Finance** is designed to carry out a simple yet conservative business, which involves holding and being a custodian of digital tokens and regulated digital currencies. The nature and purpose of this regulated ecosystem is to provide custodian and holding services to a small circle of legally verified clients (mostly reference based only), in order to help manage their digital token, regulated digital currencies and other virtual assets.

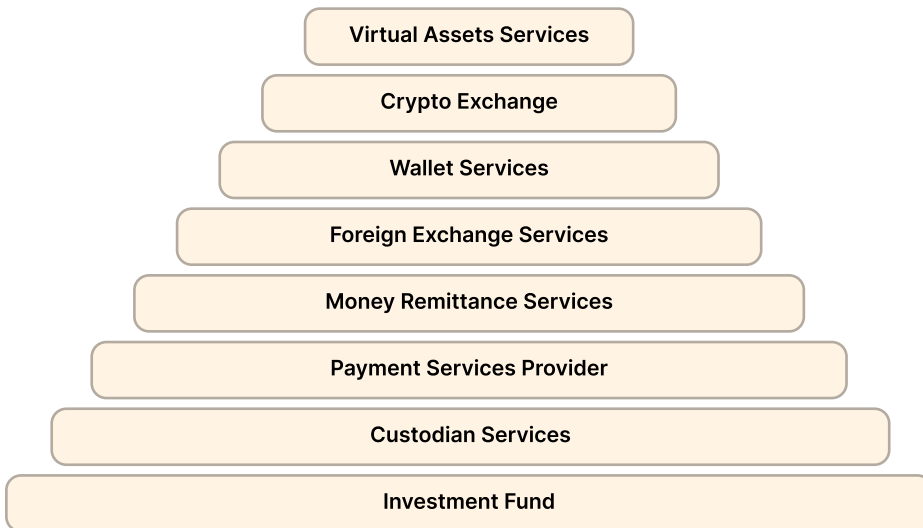

Nanos Finance - Investment Funds

Nanos Finance offers a unique investment opportunity by providing access to well-managed and highly regulated funds. To ensure we have options available for investors worldwide, we partner with Ocean Finance Cayman Islands - a CIMA registered Digital Assets Mutual Fund.

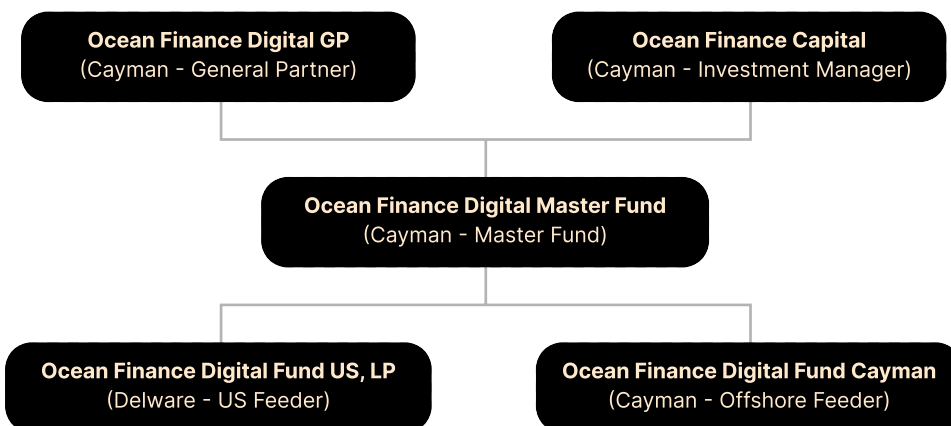

Ocean Finance Cayman Islands

Ocean Finance Cayman Islands is CIMA registered Digital Assets Mutual Fund which carries the character and function of an Investment Master Fund and Digital Master Fund authorized by the Cayman Islands Monetary Authority (CIMA).

With an organized structure of multiple level entities, the Ocean Finance Cayman Islands fund a ready to invest fund which permits the following activities to the Fund Manager and thereafter to the subscribers/investors of the International Fund.

For ease in understanding, the Ocean Finance Cayman Islands Fund consists of the following entities which as a whole constitute the Master Fund.

The aim of establishing the Ocean Finance Cayman Islands Fund is to provide International (Non US) customers an opportunity to invest with us through the 2 feeders that we have made available to channel investment of funds. This permits ease of process and convenience to all potential investors, making this Fund globally available to all investors who intend to invest with us.

Why invest with Ocean Finance Cayman Islands?

A. Strong emphasis on legal compliances

Ocean Finance Cayman Islands places high priority to all regulatory and internal compliances applicable to its Clients and to its operations team. All KYC/KYB/KYT, AML and other regulatory policies are always given the highest importance. To ensure such measures are in place, Ocean Finance Cayman Islands has subscribed to sumsub.com, a complete platform for all compliances required for this business. Additionally to ensure a second layer of protection, Ocean Finance Cayman Islands houses a full time due diligence and compliance team which carefully evaluates the client data before we begin onboarding procedures.

B. Crypto Holding, Custody and Management services

Cryptocurrency custody solutions are independent storage and security systems used to hold quantities of tokens. Custody solutions are one of the latest innovations to come out of the cryptocurrency ecosystem. The main utility of cryptocurrency custody solutions lies in the safeguarding of cryptocurrency assets. Ocean Finance Cayman Islands shall be a one of a kind investment fund and custodian services provider to clients holding crypto and other digital assets. Ocean Finance Cayman Islands to ensure secure custody of digital assets shall issue to its onboarded clients, Private keys, which are used to conduct transactions or access crypto holdings, They are extremely secured keys and are handled by seasoned IT professionals, specially trained in this order of services.

C. Small circle of legally verified clients. What do we mean?

Ocean Finance Cayman Islands has a small verified list of potential clients who trade and hold digital assets. These clients shall be verified in terms of all applicable compliances legally enforced in the Cayman Islands. To keep this circle small and clean of high risk potentials, the initial set of clients shall only be on referral basis. This means that only verified clients are free to suggest and/or refer new clients, which Ocean Finance Cayman Islands may consider onboarding, leaving the entire decision solely on the company's discretion. Since we at Ocean Finance Cayman Islands do not intend to advertise and/or market our services to the general global public, no advertisements, or hoardings shall be displayed on any web based or other platforms which enable marketing services.

Data-Driven Luxury Watch Trading

Nanos Private Collection is a data-intelligence powered luxury watch division specializing in high-value timepieces through proprietary databases, artificial intelligence valuation models, and strategic global arbitrage.

We combine market analytics with collector insight to source, evaluate, and execute transactions in rare and investment-grade watches worldwide.

Our Edge

- Proprietary global watch pricing database
- AI-driven valuation and spread analysis
- Cross-market arbitrage execution
- Discreet private client transactions
- Institutional-level due diligence

Private Inquiries

For collectors seeking rare and investment-grade timepieces and for individuals considering the discreet sale of exceptional watches from their private collections, Nanos Private Collection offers confidential consultation and execution services.

For acquisition opportunities or the discreet sale of timepieces from private collections, please contact: welcome@nnx.finance

All correspondence is handled in strict confidence.

Investment Programs

NNX Finance structures its investment programs with tangible, real-asset backing to enhance capital protection and investor confidence. Our property portfolio, verified under the Dubai Land Department (DLD) framework, serves as collateral for all real-estate-linked investment activities.

NNX offers distinct Alpha Programs. Each provides a different collateral structure and yield profile to match varying risk-return preferences.

Program 1

Liquidity Delta Strategy (Non-Collateralized)

Annual Yield (APY):
30%

Collateral:
None
(strategy-based exposure)

Currency:
USDC/FIAT

Focus:
Enhanced return potential through dynamic Quant + AI alpha generation across crypto/USD and metals markets

Program 2

API-Linked Liquidity Delta Strategy

API-Linked Liquidity Delta Strategy leverages AI/ML models to execute automated, API-connected trades within a profit-sharing framework.

Share Structure:
50/50 profit-share agreement

Currency:
USDC/FIAT

Program 3

NNX Yield (Real Estate-Backed Alpha)

Annual Yield (APY):
20%

Collateral:
Secured by NNX's real-estate portfolio under DLD verification

Collateral value:
1B USD

Currency:
USDC/FIAT

Broker Program

NNX also collaborates with selected brokers who distribute its investment programs under separate agreements.

Performance Disclosure:

Broker-distributed products are offered under private terms; no public performance figures are listed.

Structure:

Brokers operate under NNX's compliance framework and may offer tailored access to Real-Estate-Backed or Normal Alpha programs.

Commission model

NNX brokers earn on their own invested capital and on every client they personally introduce — plus a second level when those referrals bring in clients of their own.

Level 1 — Direct Referrals (example: \$5M own investment)

Referral	Investment	Rate	Commission / Year
Referral A	\$3,000,000	2.5%	\$75,000
Referral B	\$5,000,000	3.0%	\$150,000
Referral C	\$2,000,000	2.0%	\$40,000
Referral D	\$10,000,000	3.5%	\$350,000
Total	\$20,000,000	-	\$615,000

Level 2 — Sub-Referrals

Sub-Referral	Investment	Rate	Commission / Year
Referral B brings client	\$5,000,000	0.5%	\$75,000
Referral D brings client	\$3,000,000	0.5%	\$150,000
Total	\$8,000,000	-	\$40,000

Combined Annual Earnings — \$5M own investment

Source	Capital	Annual Earnings
Own investment yield (20%)	\$5,000,000	\$1,000,000
Level 1 direct commissions	\$20,000,000	\$615,000
Level 2 sub-referral commissions	\$8,000,000	\$40,000
Total	\$28,000,000	\$1,655,000

Figures are illustrative. Actual commission rates are subject to individual broker agreements with NNX.

We would be pleased to further discuss these opportunities. Please feel free to reach out welcome@nnx.finance with any questions or to request additional information. We look forward to the possibility of collaborating with you.

NNX Yield

NNX Yield is a structured real estate investment program delivering a **fixed 20% annual return** through prime Dubai property registered in the investor's name. Returns are generated through three blended income streams — rental income, the proprietary Grid Strategy Engine and portfolio reinvestment — managed entirely by NNX.

<p>MINIMUM INVESTMENT</p> <p>\$1,000,000</p> <p>Annual on own investment</p>	<p>ANNUAL YIELD</p> <p>20%</p> <p>Fixed — paid monthly</p>	<p>MONTHLY PAYOUT</p> <p>\$16,667</p> <p>Per \$1M invested</p>	<p>SETUP FEE</p> <p>2%</p> <p>One-time, covers DLD + legal</p>
---	---	---	---

How It Works — 4 Steps

Step	What happens	You receive
1. Capital deployment	You invest a minimum of \$1,000,000 USD into the Nanos Yield program	Welcome package + investment confirmation
2. Property acquisition	NNX acquires prime Dubai real estate at institutional pricing, registered in your name via SPV	Property deed(s) + independent valuation report
3. Active management	NNX manages rental operations and deploys the Grid Strategy Engine across the portfolio	Monthly performance reports
4. Monthly payout	20% annual yield distributed in equal monthly instalments (1.67%/month)	Monthly wire transfer / crypto settlement

Three Income Streams Behind Your Yield

<p>STREAM 1</p> <p>Rental Income</p> <p>Every property is a performing Dubai asset. Prime rental market delivers 4–5% per annum, providing a stable cash-flow foundation for your returns.</p>	<p>STREAM 2</p> <p>Grid Strategy Engine</p> <p>NNX's proprietary multi-asset, market-neutral algorithmic system operates 24/7 across crypto, precious metals and energy markets — generating additional yield at 2–3x leverage.</p>	<p>STREAM 3</p> <p>Portfolio Reinvestment</p> <p>As the portfolio grows, compounding effects from new acquisitions, improved rental economies and expanded trading capacity create additional income feeding into distributions.</p>
---	--	---

Why Not More Than 20%?

NNX deliberately caps investor yield at 20% for four structural reasons:

- **Sustainability** — reserves protect payments in any market condition
- **Safety buffer** — excess returns retained to ensure yield is never interrupted
- **Credibility** — 20% is an achievable, defensible, and repeatable target backed by real assets
- **Alignment** — NNX profits when the portfolio outperforms, incentivising maximum performance while protecting your floor

NNX generates significantly more than 20%. The surplus funds operating margin, safety reserves and portfolio growth — all of which ultimately protect your investment.

Investor Exit — Always Positive

Investors may exit after the initial 12-month term with 90 days notice. The property is sold at market value; proceeds are returned net of costs. Dubai's historical appreciation rates ensure investors consistently recover full capital plus yield.

Holding Period	Appreciation	Sale Price	Yield Received	Total ROI
2 years	8%	\$1.46M	\$500K	57% (~25%/yr)
3 years	12%	\$1.76M	\$750K	101% (~26%/yr)
5 years	15%	\$2.51M	\$1.25M	201% (~25%/yr)

Security Architecture

Layer	Protection	Details
Physical Asset	Real estate in your name	Property deed(s) via SPV. RICS-certified valuation. DLD registered. Insured.
Algorithmic Engine	Market-neutral strategy	Grid Engine profits from oscillation not direction. Works in bull, bear and sideways markets.
Leverage Discipline	Conservative, phased	Max 2–3x leverage, 65 hard-coded safety locks, automated circuit breakers.
Diversified Streams	Multiple income sources	Rental + algorithmic returns + portfolio compounding. No single point of failure.
Safety Buffer	Excess returns retained	Surplus above 20% held as yield continuity reserve.
Regulatory	DLD + RERA registered	All properties comply with Dubai Land Department and Real Estate Regulatory Agency.

Stress Test Scenarios

Scenario	Income Streams	Buffer	Your Yield	Outcome
Normal	All performing	Growing	20%	Business as usual
Mild downturn	Partially reduced	Absorbing	20%	Buffer covers shortfall
Severe downturn	Significantly reduced	Depleting	20%	Buffer covers (6+ months)
Extreme crisis	Minimal	Depleted	Adjusted	Transparent comms; property protects capital

Investor Terms Summary

Feature	Details
Minimum Investment	\$1,000,000 USD
Annual Yield	20% (fixed)
Distribution	Monthly — 1.67% per month (\$16,667/month on \$1M)
Collateral	Real estate registered in your name via SPV
Property Access	Full transparency — visit, inspect, verify anytime
Reporting	Monthly: yield statement + property portfolio update
Term	12-month minimum commitment
Exit	90-day notice after initial term. Property sold at market value.
Currency	USD / AED / USDT / USDC
Jurisdiction	Dubai, UAE — 0% income tax, 0% capital gains tax
Setup Fee	2% one-time (DLD registration, legal structuring, due diligence)
Management Fee	None — NNX compensated from excess portfolio returns
Contact	welcome@nnx.finance

Yield Calendar — \$1,000,000 Investment

Month	Monthly Yield (1.67%)	Cumulative	Capital Balance
Month 1	\$16,667	\$16,667	\$1,000,000
Month 3	\$16,667	\$50,000	\$1,000,000
Month 6	\$16,667	\$100,000	\$1,000,000
Month 12	\$16,667	\$200,000	\$1,000,000

After 12 months: \$200,000 in yield payments received AND ownership of prime Dubai real estate retained.

Premium Investment Tiers

Investment Level	Annual Yield	Benefits
\$1,000,000 – \$4,999,999	20%	Business as usual
\$5,000,000 – \$9,999,999	20%	Buffer covers shortfall
\$10,000,000+	20%	Custom portfolio + dedicated account manager + enhanced reporting

Where We Invest — Dubai A+ Locations

- **Palm Jumeirah** — Beachfront villas, exclusive fronds, iconic address
- **Jumeirah island** — Exclusive island living, serene waterfront estates
- **Downtown Dubai** — Burj Khalifa district, premium tenant demand
- **Dubai Marina** — Waterfront living, high rental yields
- **Emirates Hills** — Ultra-luxury, maximum value appreciation
- **Dubai Islands** — Emerging premium, high-growth corridor

Acquisition Criteria

- Acquired at significant discount to independent market valuation
- Fully furnished, brand new or fully renovated
- Immediate rental potential — no vacant holding periods
- DLD registered, RERA compliant
- Independent third-party valuation (RICS-certified) required
- Structural inspection and insurance coverage
